Maintaining our
momentum as we
muster our way
into May!

Quicker Service, Same Expertise: Ad-Tek's Team is Bigger and Better!

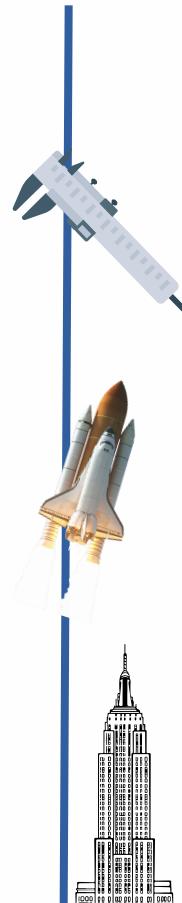

We are pleased to announce that Ad-Tek now has more technicians on the road than ever before. This expansion enables us to offer shorter wait times for scheduling calibrations and repairs, ensuring that your needs are met more quickly and efficiently. With our increased team of experts, we are likely to be in your area in the very near future. If you require our services, please do not hesitate to reach out. Our team is ready and equipped to assist you with the same high level of service and expertise you've come to expect from Ad-Tek! It also helps that we love what we do!

SPEAKING OF NCAT IGNITION FURNACES...

Oh...you weren't? We usually are here in our office and now that you're thinking about them - we have NEW ones in stock and ready to ship out! Additionally, we offer trade-ins for your current NCATs toward the purchase of a new one. If you're interested in upgrading, please have photos and the serial number available and call to inquire.

TECH TIP OF THE MONTH

Before we get on-site for your calibrations, it helps to have all of your equipment ready and organized prior to our arrival. It helps our technicians complete the job quicker and more accurately. Also letting us know ahead of time of add-ons or possible repairs, allows us to have the proper equipment and possible parts to get you all taken care of while on-site.

MAY FUN FACTS

- May 20th is World Metrology Day which is a personal favorite of ours. It honors the science of accurate measurement which is something we live by every day. Trust us to keep your lab equipment ready for success!
- May is also National Inventors Month.
- May is named after Maia - a Roman goddess of growth, plants, and spring.
- In May 1961, Alan Shepherd became the first American in space - a great example of the importance of precise measurements in scientific achievement!
- The Empire State Building opened in New York City in May of 1931 and it was built in just over a year - that's impressive!
- May's birthstone is the emerald and the two birth flowers are Lily of the Valley and the Hawthorn.
