## Out of Hibernation, Back in Spec

### ELECTRONIC DOCUMENTS

We are pleased to announce that we have an electronic option for your calibration certificates. This secure option makes it easier to retrieve your documents electronically. Please contact our Documents Team for more info.

### REFURBISHED NCAT SETRA SCALES AND TRADE-INS

Your NCAT Setra scale board and display are factory-paired – which means if one fails, the system won't function properly as a whole. Replacing just one component isn't an option.

And as you know... new Setra scales can be a significant investment.

The good news? We stock professionally refurbished, fully matched Setra boards and displays in-house – tested, verified, and ready to ship – over half off the cost of new!

Have non-working units collecting dust?

Take advantage of our trade-in program and receive up to \$500 credit for matched, non-functional board and display sets toward the purchase of a new or refurbished replacement.

Let us help you reduce downtime and save money.

### TECH TIP OF THE MONTH

Asphalt Belongs on the Road – Not on Your Screen

Before tapping the screen on your NCAT, Gyrotory, or other testing equipment, take a second to remove asphalt-covered gloves.

Touchscreens and asphalt don't mix. Residue buildup can shorten screen life, affect responsiveness, and lead to avoidable repairs.

Protect your equipment. Remove the gloves. Keep it clean.

### MARCH FUN FACTS

#### "In like a lion..."

The old saying "In like a lion, out like a lamb" refers to March's unpredictable weather - starting stormy and ending mild (at least in theory!)

#### Baseball Season is Almost Here

Opening Day for Major League Baseball typically lands in late March or early April - a sure sign that spring is near.

#### Don't Forget!

Daylight Saving Time begins on Sunday, March 8th.
